Shishkeberry did great in the desert. very stony, stupor inducing indica with bb (sort of) flavor. very

smelly

during flowering...so use

it's and clones easy. but very

stiff branches/trunk so hard to train during veg w/o breaking stems. not terribly tall...maybe 6-8'... but I

suggest it be grown at 45-60 degree angle from

excellent long and

large "beer-can-cola"

branches

producing...so I'd say above

I would SEEDBANKUPDATE Indoor

greenhouse A full,

round,

beachball-shaped

plant” – Positronics catalog

This hybrid is the pinnacle of achievement in Cannabis breeding today. The result: an extremely potent plant

with a great Sativa high. In the 1994 harvest festival this variety was miles ahead of its competitors. The high

yields compensate for the slightly longer flowering period. Hybrid vigour provides for lush growth, heavy bud

formation and abundant resin. A true champion!
